Grade 1 = excellent	Grade 2 = good	Grade 3 = satisfactory	Grade 4 = sufficient	Grade 5 = poor	Grade 6 = very poor

Explanatory notes on the certificate

David Ramiro Justo

Computer Science Expert
Subject Area: Software Development

The overall grade is based on the weighting specified in the vocational training regulations and given below:

Examination part A
Workplace project assignment	25 percent
Presentation with discussion on the subject	25 percent

Examination part B
Integrated task I	20 percent
Integrated task II	20 percent
Economics and social studies	10 percent

The workplace project assignment consists of one project or one discrete subproject with the following task: Building or modifying a software product, including design, specification, implementation and testing; or writing a requirements specification, including analysing customer needs, assessing an interface and planning integration.

The integrated task I consists of one of the following tasks: Designing a software product to solve a technical problem; sketching out a project to implement a new information and communication technology (ICT) system; developing a training module for users of an existing ICT system; developing a security and backup scheme for an existing ICT system.

The integrated task II consists of one of the following tasks: Assessing an ICT system; designing a data model for a sample application; preparing technical documents suitable for users; preparing a user consultation that addresses specific project needs based on a case study.
